

Find your osteoarthritis (OA) knee pain

Relief

Neochondro

lubricates and cushions your knee.

Indication

Neochondro is indicated for the treatment of pain in osteoarthritis (OA) of the knee in patients who have failed to respond adequately to conservative non-pharmacologic therapy and simple analgesics, e.g., acetaminophen.

Important Safety Information

Before trying **Neochondro**, tell your doctor if you have had an allergic reaction, such as swelling of the face, tongue or throat, respiratory difficulty, rash, itching or hives to **Neochondro** or any hyaluronan-based products.

YOU DON'T HAVE TO SETTLE FOR YOUR OA KNEE PAIN

It's time to explore different treatment options.

Talking to your doctor is the best way to start exploring your treatment options. And when you do, keep in mind:

Osteoarthritis (OA) knee pain affects everyone differently

An X-ray can show your grade or stage of osteoarthritis, but your level of pain isn't necessarily connected to it. Your OA could be mild with a great deal of pain or severe with little pain. Your doctor is relying on you to give them a clear description of how your knee feels.¹

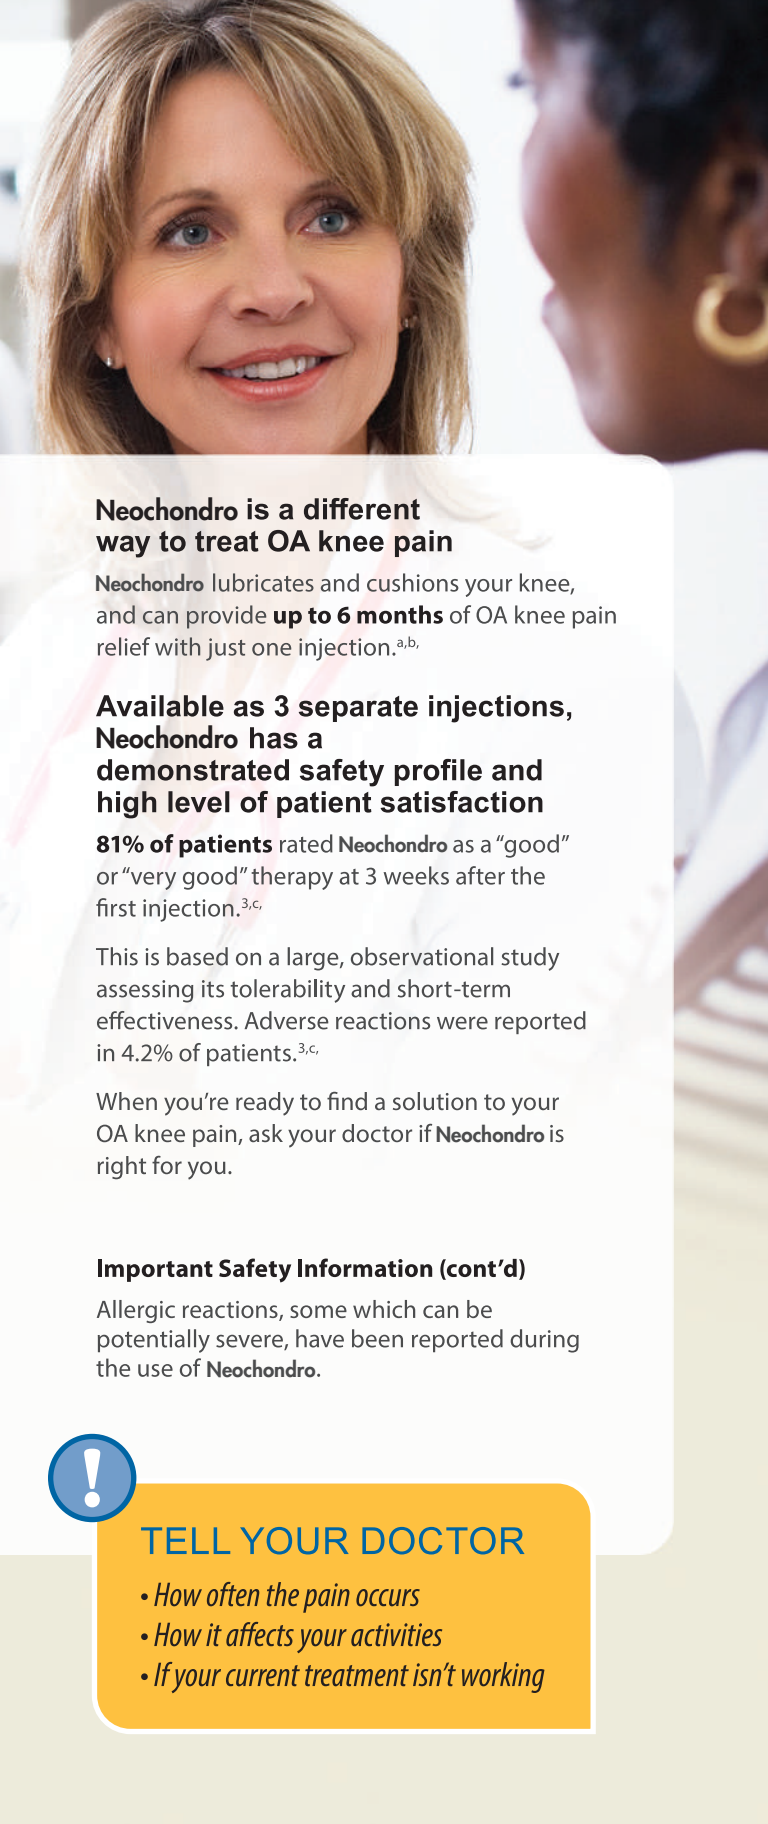

OA is caused by more than just cartilage loss

In knees with osteoarthritis, the cartilage protecting the ends of the bones gradually deteriorates, joint fluid loses its shock-absorbing qualities, and bones may begin to rub against each other—all of which may cause the OA knee pain you feel.²

3 signs it might be time for a different treatment:

1. Knee pain forces you to give things up
2. Knee pain keeps you from exercising
3. Current treatments are falling short

Neochondro

Neochondro is a different way to treat OA knee pain

Neochondro lubricates and cushions your knee, and can provide **up to 6 months** of OA knee pain relief with just one injection.^{a,b}

Available as 3 separate injections, Neochondro has a demonstrated safety profile and high level of patient satisfaction

81% of patients rated Neochondro as a “good” or “very good” therapy at 3 weeks after the first injection.^{3,c}

This is based on a large, observational study assessing its tolerability and short-term effectiveness. Adverse reactions were reported in 4.2% of patients.^{3,c}

When you're ready to find a solution to your OA knee pain, ask your doctor if **Neochondro** is right for you.

Important Safety Information (cont'd)

Allergic reactions, some which can be potentially severe, have been reported during the use of **Neochondro**.

TELL YOUR DOCTOR

- *How often the pain occurs*
- *How it affects your activities*
- *If your current treatment isn't working*

ASK ABOUT Neochondro

Designed to mimic young,
healthy joint fluid.

What is Neochondro?

Neochondro is a one-injection treatment that supplements the fluid in your knee to help lubricate and cushion the joint. It is one of the most prescribed viscosupplements and has been shown to improve OA knee pain for up to 6 months with just one injection.^{a,b}

What is Neochondro made from?

The injection contains a gel-like mixture made from a substance called non-animal hyaluronic acid.

Hyaluronan is a natural substance found in the body and is present in very high amounts in joints. The body's own hyaluronan acts like a lubricant and a shock absorber in the joint and is needed for the joint to work properly.

When should I consider Neochondro?

Neochondro is for people with knee OA who have not received enough pain relief from diet, exercise, and over-the-counter pain medication. If you've tried these options and are still feeling OA knee pain, tell your doctor and ask if **Neochondro** could help.

What are the side effects?

The most common side effects are pain, swelling, heat, redness, and/or fluid build-up around the knee. In a medical study, fewer than 6% of patients experienced those side effects, which were generally mild and did not last long.^{a,b}

Is Neochondro safe?

In the pivotal clinical trial, **Neochondro** patients experienced a similar frequency of adverse reactions compared to patients who received the placebo. Fewer than 6% of **Neochondro** patients experienced side effects, which were generally mild and did not last long.^{a,b}

Important Safety Information (cont'd)

Should not be used in patients with an infected knee joint, skin disease or infection around the area where the injection will be given, and should be used with caution when there is swelling of the legs due to problems with venous stasis or lymphatic drainage.

PREPARE FOR YOUR APPOINTMENT

Be informed about a **Neochondro** injection

How is Neochondro given?

Neochondro is a single-dose treatment that is injected directly into your knee.

What is the procedure like?

Each injection takes a few minutes and can be done in your doctor's office.

Will the injection hurt?

Your doctor will likely apply a numbing agent before your **Neochondro** injection. You may feel some pressure, but it shouldn't be painful.

Is it covered by insurance?

Neochondro is covered by Medicare and most insurance plans.
